PROFESSIONAL SUMMARY

- Computer science graduate with backend and AI engineering experience specializing in Python, Go, and SQL.
- Built agentic AI tools, Model Context Protocol (MCP) servers, LLM orchestration pipelines, and rapid prototypes.
- Professional background in data analytics, delivering enterprise KPI tracking and high-usage executive dashboards.

TECHNICAL SKILLS

Languages: Python, Go, SQL (PostgreSQL, Snowflake, SQLite), TypeScript, JavaScript, HTML/CSS
AI Engineering: PEFT/LoRA, PyTorch, Hugging Face, Agentic AI, Model Context Protocol (MCP), Streamlit, RAG, LangChain
Backend & Cloud: Gin, Express, REST APIs, JWT, RBAC, Redis, AWS (Lambda, S3, EC2), Docker, Kubernetes, Next.js
Data Analytics: PowerBI, SQL, Python, Alteryx, BigQuery/Snowflake, SAP, Excel

EXPERIENCE

- Technical IT Advisor** Oct. 2025 – Present
Middle East Enterprise Projects (MEEP) Doha, Qatar
- Modernized core web infrastructure using **Next.js** and **Tailwind CSS**, enforcing DNS security protocols (**SPF**, **DKIM**, **DMARC**) to protect domain health and email deliverability.
 - Engineered an internal **RAG document retrieval pipeline** using **Python** and vector embeddings, enabling natural language search across legacy project proposals and contract PDFs.
 - Automated operational data workflows by building a **Python PDF extraction pipeline** with structured LLM outputs, streamlining invoice parsing into an **SQLite** database.
- Data Analytics Engineer** Aug. 2023 – Oct. 2025
Signify Lighting Markham, ON
- Automated KPI tracking for rebate disputes, improving resolution rates by **33% QoQ** and reducing exposure tied to processing errors (estimated risk impact **\$615M**).
 - Developed and maintained an enterprise **Order Intake Power BI dashboard** ranked in the **top 0.2%** of organizational usage (13 of 6,505 reports).
 - Optimized Snowflake queries and data models, reducing Power BI load times for N.A. sales dashboards by **45 minutes**.

PROJECTS

- Airline Incident Classifier & Transfer Learning Engine** | *Python, PyTorch, PEFT (LoRA), Qwen2.5, Streamlit*
- Fine-tuned a 1.5B parameter base LLM via **Low-Rank Adaptation (LoRA)** and Hugging Face **SFTTrainer** on custom ChatML domain data, categorizing unstructured operational logs into strict risk tags with sub-second inference.
 - Engineered a **Streamlit Human-in-the-Loop (HITL)** auditing dashboard backed by **SQLite** persistence, enabling reviewers to override predictions and export corrected samples for active retraining loops.
- AI Data Audit & Anomaly Detection Platform** | *Python, FastMCP, Streamlit, SQLite, OpenAI API, Plotly*
- Architected an agentic audit engine using **Python** and **FastMCP** over **100k transaction records (\$533M volume)**, automating 3 risk controls (z-score volume spikes, negative values, after-hours wires) to flag **1,472 anomalies (\$288M risk)**.
 - Engineered a **Streamlit Human-in-the-Loop (HITL)** dashboard featuring natural-language-to-SQL execution, Plotly category analytics, interactive SQLite state persistence for fraud escalations, and automated markdown audit memo generation.
- LaTeX Resume Keyword Optimizer** | *Next.js, TypeScript, OpenAI API, Gemini API, LaTeX*
- Architected an automated document processing pipeline using **LLM APIs** to parse, extract keywords from, and restructure un-formatted LaTeX source files against target job descriptions.
 - Engineered a deterministic post-processing syntax engine (macro repair and AST cleanup) to enforce schema validation, ensuring **100% valid compilation** without content loss.
- BrightPixel Online Service Store Platform** | *Go, Next.js, PostgreSQL*
- Architected a **PostgreSQL relational schema with 15+ tables** and implemented **50+ RESTful API endpoints** across 8 core domains, supporting multi-store inventory and transactional payment workflows.
 - Implemented **JWT-based authentication and RBAC**, built an admin management dashboard, and wrote comprehensive unit/integration tests with **testify**.
- Travel Agency Reservation System** | *Go, React, Redis, AWS EC2, k6*
- Built a full-stack reservation system with a Go (Gin) backend on AWS EC2, implementing a **Redis cache-aside pattern** and running **k6 load tests** to optimize concurrent query performance.

EDUCATION

- Toronto Metropolitan University** Toronto, ON
Bachelor of Science in Computer Science | GPA: 3.42 Sep. 2019 – May 2025
- Stephen Lewis Secondary School** Mississauga, ON
Ontario Secondary School Diploma | GPA: 3.7 Sep. 2016 – Jun. 2019
